Job Announcement
Multimedia Graphic Design Specialist

Job Title: Multimedia Graphic Design Specialist
Status: Non-Exempt, Part-time

BSCS Science Learning is currently seeking a part-time multimedia graphic designer.

At BSCS, we are working toward a world where everyone is inspired and prepared to use science to build a better future. To get there, all young people need opportunities to experience science learning that engages their curiosities and builds a foundational understanding of how our interconnected world works. That’s where we come in.

BSCS is a nonprofit on a mission to transform science teaching and learning. We pursue our mission by translating research into powerful programs for science students, teachers, and leaders across the country. Today, BSCS is dedicated to developing our most engaging and effective programs yet—so we can make an impact where it’s needed most.

We are seeking a multimedia graphic designer to contribute to our collective work. A successful applicant will share our staff’s commitment to BSCS’s mission and values. He/she/they will also be proactive, creative, and detail-oriented, with an ability to meet deadlines under minimal supervision. The multimedia graphic design specialist will work closely with BSCS’s multimedia graphic designer on the Co-lab (in-house communications and production) team.

Required Qualifications:
- Basic knowledge of Adobe Creative Suite (Illustrator, InDesign, and Photoshop)
- Some skill in illustration
- 1 year of experience with customer/client service
- Associate’s Degree in graphic design, communications, marketing, or a relevant field of study

Ideal Qualifications:
- In-depth knowledge of Adobe Creative Suite
- Demonstrated proficiency in illustration
- 2-4 years of experience with design work and customer/client service
- In-house or agency experience in multimedia graphic design
- Basic skills in video production, web development, branding, marketing, and/or copywriting
- Bachelor’s Degree in graphic design, communications, marketing, or a relevant field of study

Job Responsibilities:
- Designing multimedia graphics for print and digital products and programs
- Meeting regularly with project teams to identify and discuss multimedia graphic design needs
- Presenting creative ideas and recommendations to project teams
- Collaborating with in-house communications and production team to meet project deadlines
- Assisting with video production/editing, website maintenance, and photography at meetings/events

**Additional Information:**
This is a remote position, with opportunities to work in the Colorado Springs office if desired. The schedule is flexible, 15-23 hours per week, and can accommodate the multimedia graphic design specialist’s work or school schedule.

The starting pay is $20.00 - $25.00 per hour, depending on experience and qualifications.

**To Apply:**
Interested applicants should send a letter of interest and a detailed résumé to careers@bscs.org. A portfolio of creative work will also be accepted. Please put “Multimedia Graphic Design Specialist” in the subject line. We will begin reviewing complete applications on August 7 and continue until the position is filled.

*BSCS Science Learning is committed to the recruitment of a diverse staff so that we can bring the broadest possible range of perspectives to our mission of improving science teaching and learning for a diverse audience. We are an equal opportunity employer. All applicants will receive consideration for employment without regard to age, race, sex, color, religion, national origin, disability (physical and/or mental), sexual orientation, gender identity or expression, veteran status, military obligations, marital status, pregnancy, genetic information, or any status protected by federal, state, or local law.*
